Sh*tty Printers

A Humorous History of the Most Absurd Technology Ever Invented

We all hate printers. This book documents why. Maybe it's the behemoth copier at work. Or the one you use to print boarding passes at home. Or maybe it's the one that haunts your nightmares to this day, the one that never seemed to work, not since the first day you plugged it in.

From the first consumer inkjet to more modern monstrosities, *Sh*tty Printers* breaks down the worst offenders of our home offices. Featuring popular and exasperating home staples such as:

- The HP Thinkjet 2225A
- The Lexmark Z22
- The long forgotten Canon BJC-85
- And many more

Brother HR-15XL

Oh brother, what have we become?

A vapid husk of our former selves. Anyway, this printer:

TofLISel. The menu of buttons on the facade of the printer reads like a New York City borough portmanteau. But rather than chauffeuring you to some super sexy fashion week, this ride drags you through the gutter grease on Canal street while some elderly crone yells "vuton!" at you from the shadows. The dark elbow of Doyers Street is the only salvation until the Tong find you and force you to print test page after test page.

Some say that late at night, the HR-15XL will appear near Manhattan & Nassau, sentenced to eternally ride the ghost line.

STRENGTHS:
Completely resistant to subway poo.

WEAKNESS:
Can't elegantly fit through the turnstile.

CHARISMA:
Harlem Boppers purple vests.

RATING:
7 / 10 Subway stabs
