*How to Safely Incorporate Candles
into an Inspiring Home Office*

To reduce fire risk, place candles away from objects like paper, books, curtains, wires, electronics, and office plants. Container candles or travel candles are perfect for a desk because there's no wax spillage to worry about. Keep lit candles in your field of view at all times to make sure they're burning safely—for example, place next to a computer monitor at a safe distance.

ZEN ARRANGEMENTS

Add tranquility to your place of productivity by artfully arranging your candles with Zen complements. The bob of a floating candle can calm you at your desk. Fill a hurricane holder with smooth stones or lush greenery for a centering effect. Or surround pillar candles with rock cairns or succulents. Bring the calming effect of a forest inside by adding elements of the natural world to your work space.
